

Application No.: 09/653,286  
Amendment

AMENDMENTS TO THE CLAIMS

1. (Currently amended): An entertainment system comprising:  
an entertainment apparatus for executing various programs;  
at least one manual controller for inputting a manual  
control request of a user to said entertainment apparatus;  
a display monitor for displaying an image outputted from  
said entertainment apparatus; and

message displaying means for displaying a message on said  
display monitor such that a color of words of a category changes  
in response to, and to indicate, experiences of a character in a  
scenario of a program executed by the entertainment apparatus  
~~after an event or a condition occurs.~~

2. (Original): An entertainment system according to claim  
1, wherein message data to be processed by said message  
displaying means comprises a plurality of combinations of a data  
unit indicating a word to be displayed and a display color code  
of said word to be displayed, said display color code indicating  
a display color of said word corresponding to a type of said  
word.

3. (Original): An entertainment system according to claim  
2, wherein said message determining means comprises display  
color code setting means for determining a type of a word having  
an undefined color code in said message data and defining said  
undefined color code based on the determined type.

4. (Original): An entertainment system according to claim  
1, wherein said message displaying means comprises message frame  
displaying means for displaying a message frame containing said  
message.

Application No.: 09/653,286  
Amendment

5. (Original): An entertainment system according to claim 4, wherein said message frame displaying means comprises message frame determining means for determining a display area of said message frame based on the number of characters in said message and display areas of main objects in a scene presently displayed on said display monitor.

6. (Currently amended): An entertainment apparatus for executing various programs, said entertainment apparatus being connectable to at least one manual controller for inputting a manual control request of a user to said entertainment apparatus, and connectable to a display monitor for displaying an image outputted from said entertainment apparatus,

wherein said entertainment apparatus comprises message displaying means for displaying a message on said display monitor such that a color of words of a category changes in response to, and to indicate, experiences of a character in a scenario of a program executed by the entertainment apparatus ~~after an event or a condition occurs.~~

7. (Currently amended): A recording medium for storing a program and data for use of an entertainment system, said entertainment system comprising:

an entertainment apparatus for executing various programs;  
at least one manual controller for inputting a manual control request of a user to said entertainment apparatus; and  
a display monitor for displaying an image outputted from said entertainment apparatus;

wherein said program comprises the step of displaying a message on said display monitor such that a color of words of a category changes in response to, and to indicate, experiences of a character in a scenario of a program executed by the

Application No.: 09/653,286  
Amendment

~~entertainment apparatus after an event or a condition occurs.~~

8. (Original): A recording medium according to claim 7, wherein message data to be processed in said step of displaying a message comprises a plurality of combinations of a data unit indicating a word to be displayed and a display color code of said word to be displayed, said display color code indicating a display color of said word corresponding to a type of said word.

9. (Original): A recording medium according to claim 8, wherein said step of displaying a message comprises the step of determining a type of a word having an undefined color code in said message data and defining said undefined color code based on the determined type.

10. (Original): A recording medium according to claim 7, wherein said step of displaying a message comprises the step of displaying a message frame containing said message.

11. (Original): A recording medium according to claim 10, wherein said step of displaying a message comprises the step of determining a display area of said message frame based on the number of characters in said message and display areas of main objects in a scene presently displayed on said display monitor.

12. (Currently amended): A program readable and executable by a computer, said program being for use of an entertainment system comprising:

an entertainment apparatus for executing various programs;  
at least one manual controller for inputting a manual control request of a user to said entertainment apparatus; and  
a display monitor for displaying an image outputted from

Application No.: 09/653,286  
Amendment

said entertainment apparatus;

wherein said program comprises the step of displaying a message on said display monitor such that a color of words of a category changes in response to, and to indicate, experiences of a character in a scenario of a program executed by the entertainment apparatus after an event or a condition occurs.

13. (Currently amended): The entertainment apparatus as claimed in claim 1, wherein the message displaying means is configured to determine if an the event or a the condition occurs, and to display a first word of a same type in meaning in said message in an alternate color.

14. (Previously presented): The entertainment apparatus as claimed in claim 1, wherein the displaying of the message includes displaying the message on said display monitor such that the color of a word of a type in said message is dependent on previous manual control requests.

15. (Currently amended): The entertainment apparatus as claimed in claim 6, wherein the words of the category in said message are displayed in a first color when events have not occurred and the words of the category in said message are displayed in a second color when the events have occurred.

16. (Currently amended): The entertainment apparatus as claimed in claim 6 wherein the displaying of the message includes displaying the message on said display monitor such that words of a same type in meaning in said message are displayed in one of two colors, where a word is displayed in a first color of the two colors if an the event or a the condition occurs.

Application No.: 09/653,286  
Amendment

17. (Previously presented): The recording medium as claimed in claim 7, wherein a first word and a second word of a first type are displayed in a first color if a first event and a second event, respectively, have not occurred, and the first word of the first type is displayed in a second color if the first event has occurred.

18. (Previously presented): The entertainment apparatus as claimed in claim 17, wherein the second word of the first type is displayed in a second color if the second event has occurred.

19. (Canceled).

20. (Previously presented): An entertainment system in accordance with claim 1, wherein the category comprises a place category and the color of a word of the place category indicates whether a character has previously visited the place.

21. (Previously presented): An entertainment system in accordance with claim 1, wherein the category comprises a person category and the color of a word of the person category indicates whether a character has previously met the person.

22. (Previously presented): An entertainment apparatus in accordance with claim 6, wherein the category comprises a place category and the color of a word of the place category indicates whether a character has previously visited the place.

23. (Previously presented): An entertainment apparatus in accordance with claim 6, wherein the category comprises a person category and the color of a word of the person category indicates whether a character has previously met the person.

Application No.: 09/653,286  
Amendment

24. (Previously presented): A recording medium in accordance with claim 7, wherein the category comprises a place category and the color of a word of the place category indicates whether a character has previously visited the place.

25. (Previously presented): A recording medium in accordance with claim 7, wherein the category comprises a person category and the color of a word of the person category indicates whether a character has previously met the person.

26. (Previously presented): A program in accordance with claim 12, wherein the category comprises a place category and the color of a word of the place category indicates whether a character has previously visited the place.

27. (Previously presented): A program in accordance with claim 12, wherein the category comprises a person category and the color of a word of the person category indicates whether a character has previously met the person.

28. (New): An entertainment system comprising:  
an entertainment apparatus for executing various programs;  
at least one manual controller for inputting a manual control request of a user to said entertainment apparatus;  
a display monitor for displaying an image outputted from said entertainment apparatus; and  
message displaying means for displaying a message on said display monitor such that a color of words of a place category changes in response to, and to indicate, whether a character in a scenario of a program executed by the entertainment apparatus has previously visited the place.

Application No.: 09/653,286  
Amendment

29. (New): An entertainment system comprising:  
an entertainment apparatus for executing various programs;  
at least one manual controller for inputting a manual  
control request of a user to said entertainment apparatus;  
a display monitor for displaying an image outputted from  
said entertainment apparatus; and  
message displaying means for displaying a message on said  
display monitor such that a color of words of a person category  
changes in response to, and to indicate, whether a character in  
a scenario of a program executed by the entertainment apparatus  
has previously met the person.
